

Break out the bait balls and the cane poles, shrimp baiting season is here! Shrimp baiting uses a cast net, bait and long poles.

The long poles are used to mark a specific location and then bait is thrown into the water near the poles. After several minutes, the cast net is thrown as close to the bait as possible and the shrimp are caught in the net! The bait balls can be made of just about anything a shrimp will eat. The most common bait is a mixture of powdered clay and fish meal. Other popular baits are flour, cornmeal, cat food and chicken feed. Bait balls range in size from a tennis ball to a softball and are typically flattened out to a hamburger shape. With a license, the catch limit is 48 quarts of shrimp measured heads-on (or 29 quarts measured heads-off) per boat or set of poles per day. Each boat is limited to a set of 10 poles. The season lasts for 60 days and will remain open until 12:00 noon on Tuesday, November 10. South Carolina has two species of shrimp, brown (*Farfantepenaeus aztecus*) and white (*Litopenaeus setiferus*).
